Since 1969, Centurion Products has led the way to secure stability and performance in the precast stone industry. Architects, builders, general contractors and designers nationwide are confident in the craftsmanship offered by Centurion as a global leader. The "Close to Nature" appearance of Centurion's wide variety of products has made it a favorite worldwide for decades.

Our stone has a distinct advantage because it is lighter, cost effective and easier to install than natural stone. Our state of the art facility enables us to manufacture quality products that meet the high standards we set for ourselves and that our customers' expect. Centurion maintains a timeless goal of making a product that will last for decades regardless of the climate.
